

CLEANING / WASHING METHOD FOR GLOVE S600

It is important to properly clean and launder your safety gloves to increase its lifespan and keep you hygienically clean.

It also helps to save money in the long run and achieve green initiatives by reducing waste.

We recommend the following steps to clean/wash the S600 gloves safely :

1. Recommended to wipe with clean damp cloth or wipes.
2. If necessary, the exterior can be washed under flowing water and hang dry.
3. Suitable for sanitizing with sanitizer 70%-75% Isopropyl alcohol.
(For sanitizing procedure, please refer Sumirubber website)
4. Machine wash **NOT** recommended.

DISCLAIMER:

1. Improper use of the gloves or submitting them to a cleaning or laundering process which is not specifically recommended can alter their performance level.
2. Sumirubber do not accept any liability once glove have been washed.
