

CLEANING / WASHING METHOD FOR GLOVE ST7 BK

It is important to properly clean and launder your safety gloves to increase its lifespan and keep you hygienically clean.

It also helps to save money in the long run and achieve green initiatives by reducing waste.

We recommend the following steps to wash the ST7 BK safely :

1. Machine or hand washing with cold water (40°C-60°C) with neutral detergent.
2. Do **NOT** use chlorinated bleach or any detergents that contain bleach.
3. Natural air dry, pull to shape and allow to dry flat.
4. Tumble dry is **NOT** recommended.
5. Sanitizing with sanitizer is **NOT** recommended

DISCLAIMER:

1. Improper use of the gloves or submitting them to a cleaning or laundering process which is not specifically recommended can alter their performance level.
2. Sumirubber do not accept any liability once glove have been washed.
