

# WASHING AND DRYING CONDITION FOR GLOVE VJ6(5) TY

It is important to properly launder and clean your safety gloves to increase its lifespan and keep you hygienically clean.

It also helps to save money in the long run and achieve green initiatives by reducing waste.

## We recommend the following steps to wash the knitted cut resistant gloves safely :

1. Use neutral detergent or eco-friendly detergent (do not use dry cleaning solutions).
2. Wash for 20 minutes in warm water, do not exceed 40°C.
3. Rinse for 20 minutes in warm water, do not exceed 40°C.
4. Hang dry / airing gloves in room to avoid UV Light exposure.

## DISCLAIMER:

1. Do not use water at very high temperatures as extreme heat can change the construction of the gloves.
2. Do not use bleach or fabric softener as it may wear away the fibers in the glove and affect the gloves protection level.
3. Laundering a glove may impact its performance overtime especially when there is sign of fraying/loosening of knitting.

Sumirubber do not accept any liability once glove have been washed.
